This report is a summary of your patient encounters who has had an event at a connected hospital in the last 24hrs. Additional information can be found at SHAREArkansas.com

Step 3:

Once you are logged in to your SHARE secure messaging you will need to toggle over at the top of the page to the Virtual Health Record (Mirth Results). Once you are in the Virtual Health Record you will need to look up the patient by last name and date of birth that you received the Daily Report so that you can bring up the patients' recent discharge summary:

The screenshot shows the 'Mirth Results' search interface. At the top, there are navigation tabs: 'Provider Directory', 'Mirth Results', and 'Web Mail'. The 'Mirth Results' tab is selected, and a blue arrow points to it. The interface includes a search filter for 'Patients', a search type selector (My Patients, All Patients), and a search requirements section (Last Name and Date of Birth). Below this is a 'Reason For Search' dropdown set to 'Treatment'. The 'Demographic Search' section contains input fields for Last Name, First Name, Date of Birth, Street 1, Street 2, City, State, Country, and ZIP Code. The 'Identifier Search' section has fields for Patient Alias and Insurance Plan ID. At the bottom, there is a 'Results' count of 100, a 'Submit' button, and a 'Cancel' button.

Step 4: Once you have accessed your patient you will need to look for the hospital encounter date from the recent 24 Hour Daily Report that you received as seen below:

The screenshot shows the SHARE patient portal for Paul A. Sharetest1. The page includes a navigation menu on the left with options like 'Back to List', 'Download Summary PDF', and 'Share Summary'. The main content area displays patient information and several data tables. A blue arrow points to the 'Ambulatory Encounters (0)' table.
